SERVICE

Murrieta Gardens is an established leader in memory care, with 24-hour care and a supervised environment. We are dedicated to helping residents live as independently as possible, and encourage active participation in the community through appropriate programming and engagement with our highly trained staff. In addition to community-wide activities and events, Murrieta Gardens offers meaningful activities that are specifically designed to encourage a sense of belonging and purpose, foster relationships, and affirm a sense of self.

Secure Community A common symptom in memory loss is the urge to wander. We closely monitor all residents and have 24/7 staff.

Engaging Activities We want to celebrate our residents, make them smile, and bring them joy throughout the day. Our programming is designed to decrease stress, reduce anxiety, and offer flexibility for changes in mood or cognition.

Personalized Care Our licensed nurse creates a personalized care plan for all residents and is actively involved in monitoring changes in health care needs. Our medication care managers provide assistance with the daily task of managing prescriptions.

Nutrition and Dining Our chefs create a variety of menu items for those who have issues with swallowing or chewing, and visually appealing plates packed with color for those residents with a weaker sense of smell and taste. Our intimate memory care dining rooms offer greater personal assistance during meals.

Additional Services We shoulder the responsibilities of daily life by providing housekeeping, laundry services, transportation, maintenance, and all utilities (except phone and cable services). We also offer a beauty salon and barber within the community.
